Alexandria, VA 22313-1450

Sir:

We, Yinghe Hu and Cecilia Jiang, state as follows:

1. We are the named co-inventors of the above-captioned patent application.
2. During the period of time in which the invention was made, one of us, Yinghe Hu, was the principle investigator in charge of the underlying research project, and the other, Cecilia Jiang, was a senior research associate who conducted the majority of the experimental work and also took part in analysis of the resulting data from which the instant invention is derived.
3. We understand that the Examiner has cited Jiang et al., Anal. Biochem. 316: 34-40, 2003 ("Jiang et al.") as prior art under 35 USC §102(a) in rejecting the invention claimed in the subject patent application. We understand that the basis of the rejection is that the inventive entity of the present invention differs from the authorship of the Jiang et al. publication.
